

Automated Commercial Environment—Requirements Recommendation

Date:	July 27, 2001
Number:	ITD-015
Requestor:	ITDS Sub-Committee
Customs Co-Chair:	Don Kusser
Trade Co-Chair:	Tom Anastasi and Sandra Scott

Requirement

NHTSA: Entry Summary

For all Track 4 shipments NHTSA data for the reported commodities will be collected in the entry summary. The NHTSA data collected will be similar to that currently collected in ABI, except that ITDS data standards will be adopted to the extent that is possible.

NEXT STEPS: Consult with NHTSA to incorporate their requirements into the NCAP/P Entry Summary CUSDEC.

Business Need

To maintain integrated reporting of Customs and NHTSA data, as currently provided by ABI.

Technical Need

A single electronic edit response message reflecting the results of all agencies' edits will be returned. ITDS may need to perform some data conversion in order to support current NHTSA interface requirements.

Benefits

Permits electronic reporting of data required by NHTSA. Promotes ITDS goal of fully electronic reporting. Avoids expense of separate NHTSA reporting.
